Quick Mixing Instructions:

Warm liquid (for best results, btw 100-120F). Per usage instructions, mix in Gelmix until completely dissolved. Wait 5 minutes for mixture to thicken and cool to a safe feeding temperature. Mix again before serving.

Usage Instructions

Infants and Children under 3 years old:

Half-Nectar: Add 1 packet for every 6-8 fl ounces of liquid.*

Nectar-Thick: Add 1 packet for every 4 ounces of liquid.

*For infants and children under 3 years old, do not use more than one packet Gelmix per 4 ounces of liquid. To avoid gassiness, start with lowest concentration, particularly for infants 6-12 pounds.

Adults and Children over 3 years old:

Nectar-Thick: Add 1 packet for every 4 ounces of liquid.

Honey-Thick: Add 1 packet for every 2 ounces of liquid.

Usage instructions may need to be adjusted based on the viscosity (thickness) of the original diet.
